Step 2: Divide the Face

To ensure proper proportions, divide the oval into thirds both horizontally and vertically using faint lines. These lines will help you position the facial features accurately.

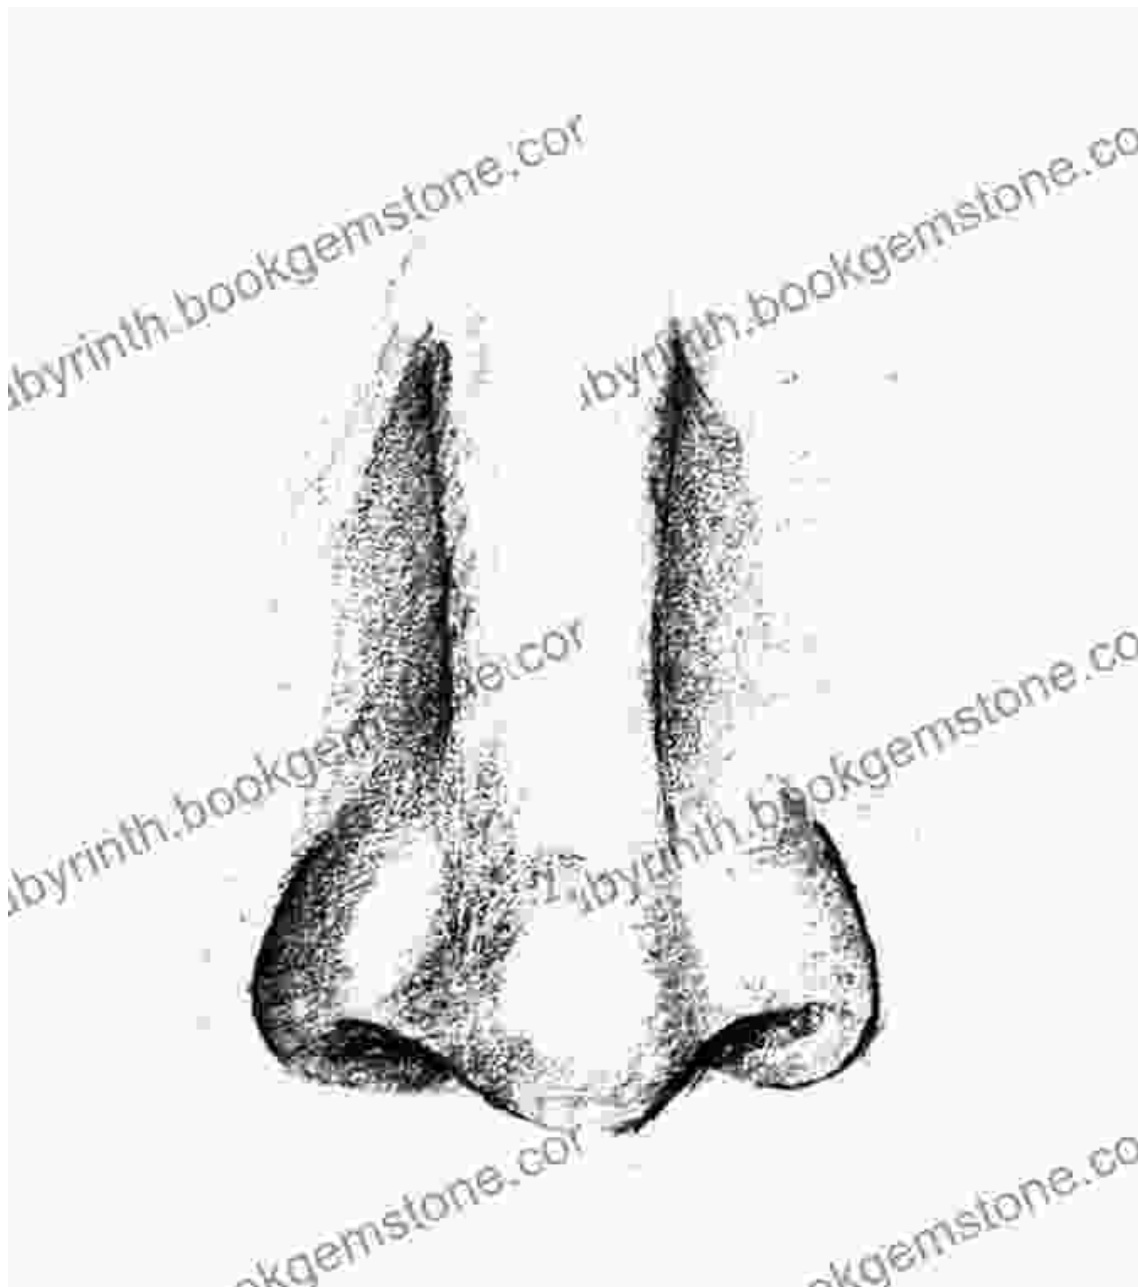

Step 3: Draw the Eyes

Locate the horizontal third line and mark the center points for the eyes. Draw two ovals that overlap the horizontal line slightly. Add pupils and irises for definition.

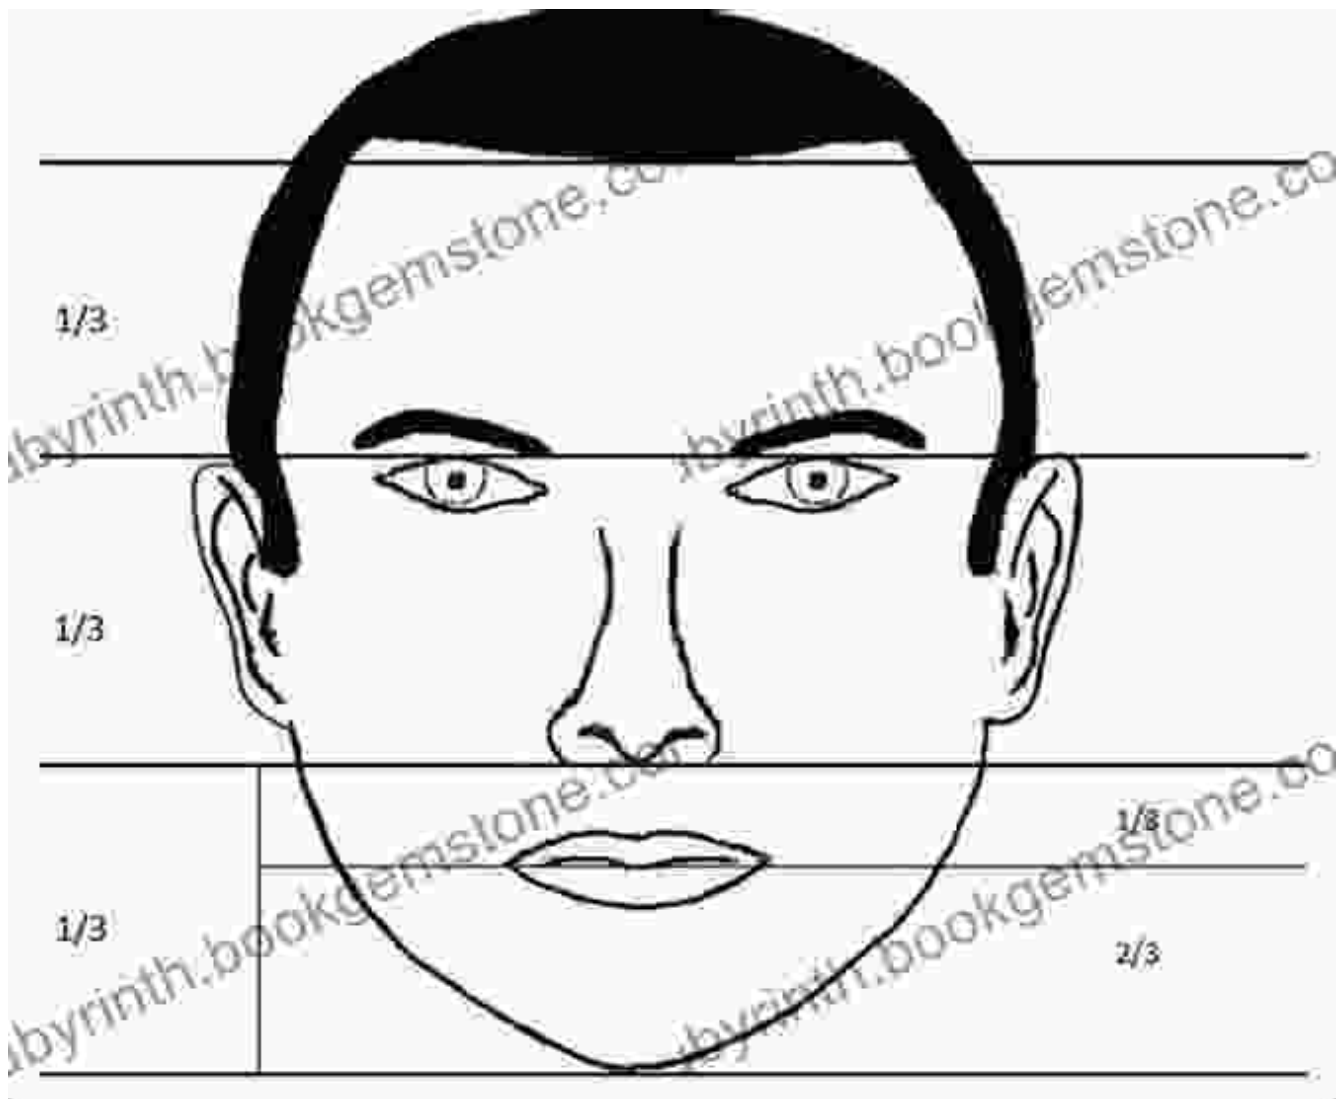

Step 4: Sketch the Nose

Draw a triangle for the nose, extending it from the center of the horizontal line to the bottom third line. Add nostrils to give it depth.

Step 5: Draw the Mouth

Mark the center of the bottom third line for the mouth. Draw a curved line for the upper lip and a straight line for the lower lip. Add shading to create the illusion of volume.

Step 6: Add Ears

Draw two ovals on either side of the face, slightly above the eyes. These represent the ears. Define the inner and outer folds for realism.

Step 7: Refine and Shade

Use a soft pencil to refine the outlines and gradually shade the face to create depth. Pay attention to the light source and add highlights and shadows accordingly. Add hair and other details to complete the portrait.

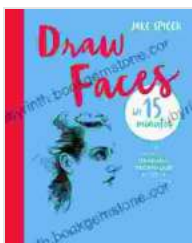

Tips for Success

- **Practice regularly:** The more you practice, the easier it will become to capture the subtle nuances of the human face.
